## *Resolved Issues*

This section lists the resolved issues in HP TeleForm version 10.9.2.

- TF-7752: WCO - Files named with German characters do not transfer correctly in some cases
- TF-7559: Use UTF-8 encoding for XML export.
- TF-7665: Issue with installing RightFax Connect Agent DLL
- TF-7694: Test WCO under IE11 Compatibility View and Enterprise Mode

- TF-7728: TeleForm Designer does not produce a random template ID when the method is “Random”
- TF-7745: Possible to delete (Default) scanner set.
- TF-7750: Field in form not Highlighted in Verifier when “Don't move image” is used
- TF-7751: WCO - Newly created users are automatically logged in when created.
- TF-7752: Remote batches with Unicode data fields in XML have data corrupted.
- TF-7767: QC Zoom mode does not see page count unless thumbnail already loaded. Also, form title not displayed in zoom mode when item is page item
- TF-7774: Unhandled Exception when processing specific TFM files
- TF-7776: Copy/Paste rich Romanian characters from Word is getting corrupted
- TF-7780: Capture to Dir - VB.NET PDF export Fails to export the Last Page
- TF-7787: Tab order of TeleForm Login screen
- TF-7790: Reader evaluates batches in reverse order
- TF-7791: VBA is re-seeding the random generator with a constant
- TF-7793: WCO - Progress dialog shows bad string for filename
- TF-7794: Handprint engine updated to resolve a few old issues that only occurred with a single image
- TF-7802: Forms created in 10.6 with Cyrillic Characters have garbled text when imported in any later release
- TF-7809: Maximum field name length configuration option does not impact Capture Zones
- TF-7810: Odd behavior when field length exceeded for SKFI field names.
- TF-7821: Meridio Auto Export Missing First 2 characters for PDF reference XML file
- TF-7825: WCO Job Configuration issues: 1) Filters should not reset when you select a different job. 2) Roles should not be cleared from a job when the job is selected (happens if the role is not in the filtered list).

5. Search or browse the Knowledge Base.

**To search the knowledge base**

- a. In the Search box, type a search term or phrase, and then select **Search**. Documents that match the query display in a results list.

**To browse the knowledge base**

- a. Select one or more of the categories in the **Browse** list. You can browse by:
  - **Repository**. Filters the list by Documentation produced by technical publications, or Solutions to Technical Support cases.
  - **Product Family**. Filters the list by product suite or division. For example, you could retrieve documents related to the Capture and BPM, IDOL, or KeyView product suites.
  - **Product**. Filters the list by product. For example, you could retrieve documents related to Process Automation, TeleForm, or IDOL Server.
  - **Version**. Filters the list by product or component version number.
  - **Type**. Filters the list by document type. For example, you could retrieve Guides, Help, Packages (ZIP files), or Release Notes.
  - **Format**. Filters the list by document format. For example, you could retrieve documents in PDF or HTML format. Guides are typically provided in both PDF and HTML format.

6. To open a document, select its title in the results list.

To download a PDF version of a guide, open the PDF version, select the **Download** icon  in the PDF reader, and save the PDF to another location.

To download a documentation ZIP package, select Get Documentation Package under the document title in the results list. Alternatively, browse to the desired ZIP package by selecting either the Packages document Type or the ZIP document Format from the Browse list.
