EvaSys
Survey Automation Cloud

EVASYS CLOUD

EFFICIENTLY CAPTURE EVALUATION FEEDBACK

„With EvaSys Cloud it is possible for us to evaluate all seminar topics consistently, quickly and efficiently nationwide."

Andreas Kuffel, SVG Service und Vertrieb Süd GmbH

EvaSys
Survey Automation Cloud

EvaSys Survey Automation Cloud

The survey software from the market leader as a flexible subscription model

The EvaSys Survey Automation Cloud is the subscription model for the cross-media mass management of survey processes with the established software EvaSys. The survey can be conducted as a classic paper-based survey, online survey or combined as a hybrid survey. From creating questionnaires to the automated capturing and evaluation, EvaSys Cloud supports various organizations with the conduction of surveys. The web-based platform is available immediately, without causing costs or efforts for your IT department

EvaSys Cloud is suitable for a wide variety of survey projects and can for example be utilized in the areas of further education, quality management, empirical research, employee development, market research or customer service. With EvaSys Cloud, you receive an unrivaled level of automation of the entire survey process. Without internal server hosting and a long-term binding license, EvaSys Cloud is the flexible SaaS solution from EvaSys.

As the leading supplier of software solutions for the conduction of cross-media surveys and examinations, which are created, completed and evaluated in an automated fashion, we look back on over 20 years of experience in the mass processing of paper-based questionnaires. Over 1.500 satisfied customers all over the world are both affirmation and motivation for us. Benefit from our experience and let us succeed together.
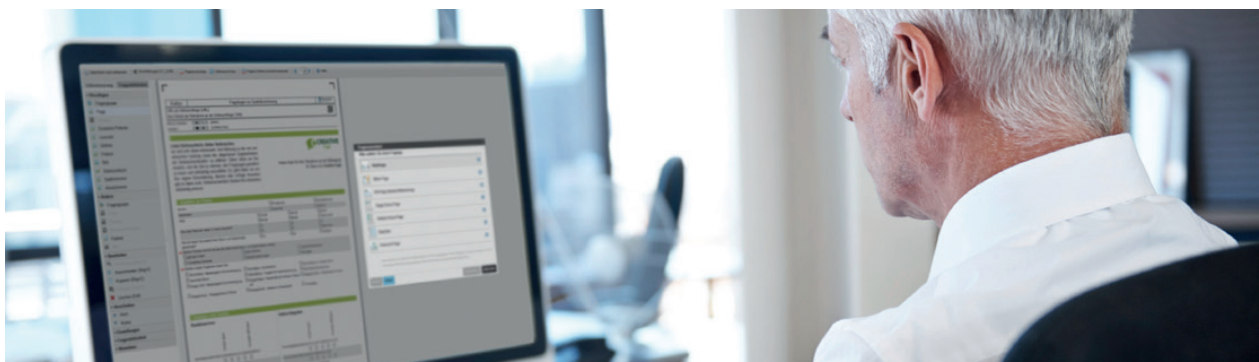

EvaSys Cloud versions

Standard and Premium

The EvaSys Survey Automation Cloud is available as a Standard or Premium version. As such we can fulfill the diverse requirements of the organizations that employ EvaSys Cloud.

EvaSys Cloud Premium offers many functions for the mass conduction of surveys. You can thus tap the full potential of the software. EvaSys Cloud Premium is the right choice particularly for larger survey projects,

EvaSys Cloud Standard has fewer automation functions and is thus suitable for smaller survey projects. Module evaluations as well as the mapping of the organizational structure are not possible with EvaSys Cloud Standard.

Secure server hosting

Full-service from one source

EvaSys Cloud includes all services necessary to use the system securely and efficiently. With the integrated hosting service the need for server hardware and IT resources becomes obsolete, as Electric Paper Evaluationssysteme GmbH assumes the provision and maintenance of the Cloud system. We operate the server hosting in cooperation with Hetzner Online GmbH, an ISO 27001 certified server hosting provider based in Germany. Electric Paper Evaluationssysteme GmbH employs an ISMS (information security management system) as well as an external IT security manager and guarantees internal processes based on officiary IT requirements.

- Permanent monitoring of the system
- Daily data backup with 14-day
- Encrypted communication
- Contract based on German Federal Data Protection Act
- Installation of patches, service packs and updates
- System recovery within 24 hours

PROVISION AND
MAINTENANCE
OF THE SYSTEM

5 Quality management
QM views and
standardization
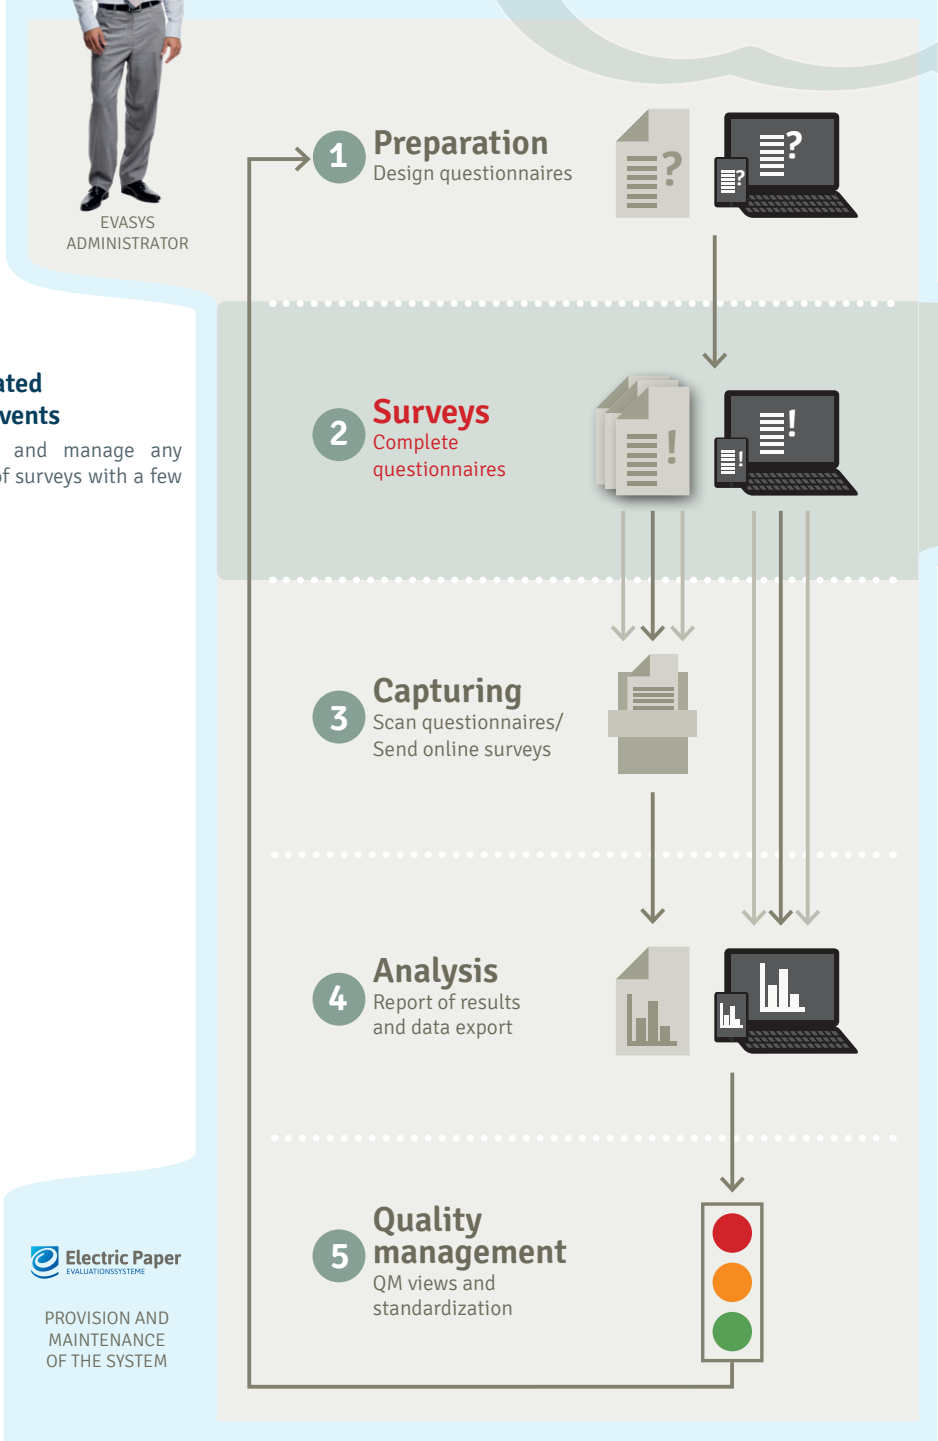

Phase 1: Preparation

Mapping the evaluation structure and designing questionnaires

- Import function for structural and participant data
- Integrated questionnaire editor (VividForms Editor) for the design of questionnaires
- Various question types (for example scaled questions, single or multiple choice questions, ranking questions, segmented open questions, open questions, matrix questions)
- Comfortably create questions with the aid of an assistant
- Population of questionnaires with structural data
- Integrated question library
- Web-based application allows work independent of your work station
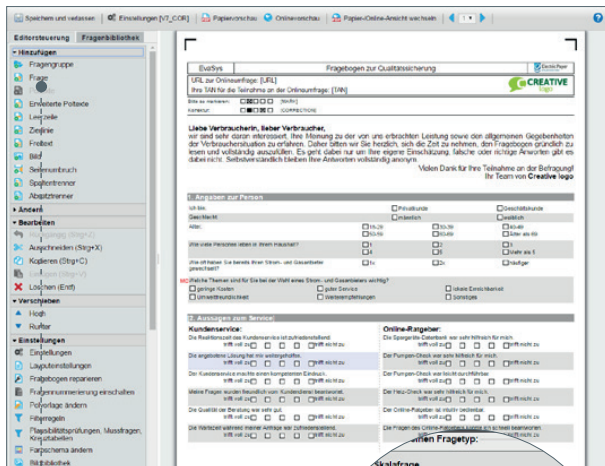

Create questions with the aid of the question assistant
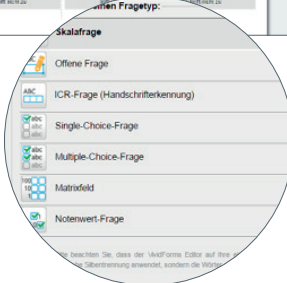

„The handling with the EvaSys Cloud is easily comprehensible. If you are ever stuck, the webinars help."

Andreas Kuffel, SVG Service und Vertrieb Süd GmbH

Phase 2: Survey

Conducting paper-based, online and hybrid surveys

- Generate any number of paper-based, online and hybrid surveys with just a few clicks
- Output of the PDF-printing file for paper questionnaires
- Direct distribution and subsequent collection results in high acceptance and return rates
- Anonymous and non-anonymous online surveys
- Adaptation of survey layout to mobile devices
- Automatic generation and distribution of PSWDs for online surveys
- Accessible online surveys for visually impaired participants (WCAG 2.0 Level AA)
- Multilingual online surveys for survey participants with different mother tongues
- Online surveys in presence via the provision of QR-codes
- Hybrid surveys for different participation alternatives

Phase 3: Capturing

Scanning questionnaires and capturing the online survey

- Automatic evaluation of paper-based, online and hybrid surveys
- Capturing of questionnaires via a scanner
- Automatic allocation of questionnaires to the right survey thanks to modern reading technology
- Display of open questions as image section with anonymization function
- Creation of PDF- and HTML-instant reports with clear and graphic representation of results and individual customization options
- Depiction of results in histograms, profile lines, summarizing indicators, quality guidelines in the form of traffic light illustrations as well as a presentation slide

dev.=1,2
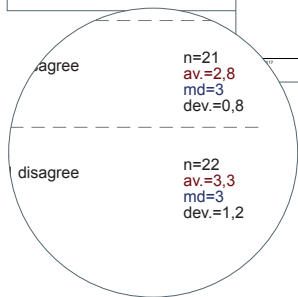

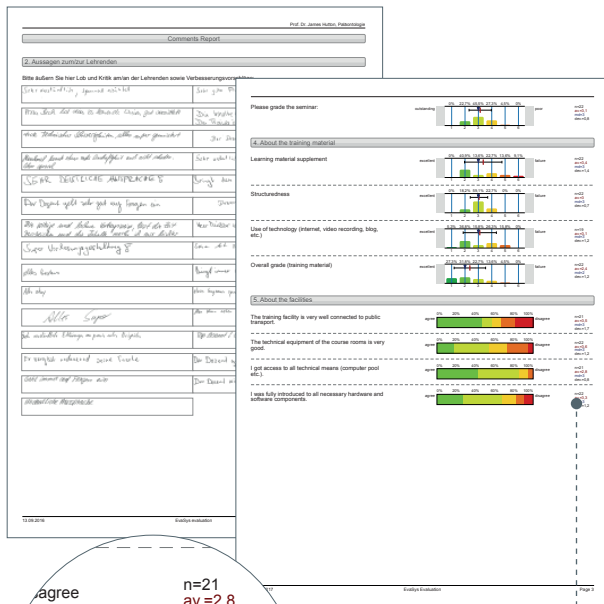

Extract from a PDF-Report

Phase 4: Analysis

Creating further evaluations and reports

- Summary or comparison of reports for different departments and courses
- Generation of subunit reports
- Comparison of profile lines, for example with previous surveys (internal benchmarking)
- Automatic distribution of comparative reports with aggregated means or time series
- Raw data export of results for Excel, Sphinx and SPSS
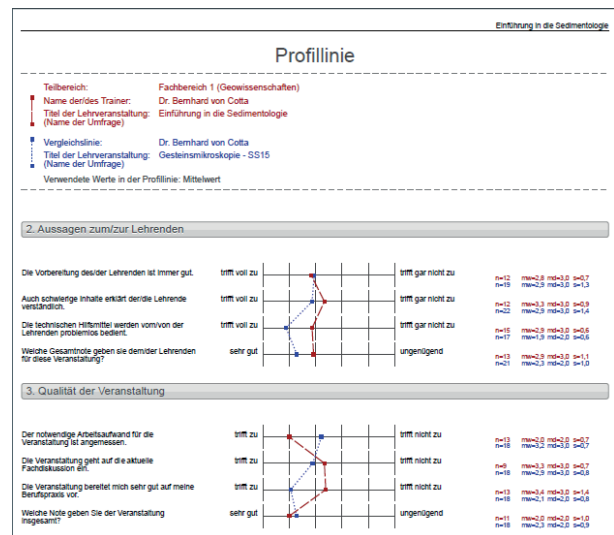

Comparative profile lines in the PDF-report

Phase 5: Quality management

Overview and transparency with quality management views

- Definition of target values for subsequent quality control
- The quality management portal enables the identification of key indicators
- Generation of reports with periodic, time-controlled mailings
- Highlighting of extremely positive or negative results

Conclusion

EvaSys Cloud is a powerful survey software that can be utilized for various survey projects. An own IT infrastructure is not necessary. Your data is located on high-capacity servers in Germany. The software is ideally suitable for the professional conduction of survey projects and permits quick and efficient evaluations. Our support team is available for any questions regarding the handling and operation of our products and offers quick and straightforward help. The benefits at a glance:

- Web-based application for work independent of your work station without an installation
- Secure server hosting by an ISO 27001 certified hosting provider in Germany
- Paper-based, online and hybrid surveys
- Friendly and competent support for quick and straightforward help with technical problems
- Optimized display of online surveys for tablets and smart phones
- Automated batch events with a few mouse clicks
- Data import from course management systems (CSV, XML)
- International user community for exchange of experiences
- Optimal start of the project with our training and coaching offers

Applications

One solution for various applications

Regardless whether extensive survey project or a single survey: EvaSys Cloud is flexible and versatile in the Standard as well as Premium version and is utilized in various industries. We offer the right solution for all applications. For example for the following areas:

- Teaching evaluation (courses, programs, modules)
- Employee surveys
- Patient surveys
- Surveys in training and further education
- Seminar evaluation
- Customer satisfaction surveys
- And many more

Convinced!

How do I get in touch?

Talk to our employees about your specific ideas and requirements and clarify all questions about our products. We are happy to advise you at a personal meeting and compile a non-binding offer for you! Find the right solution for your application with us and contact us. We are looking forward to hearing from you!
